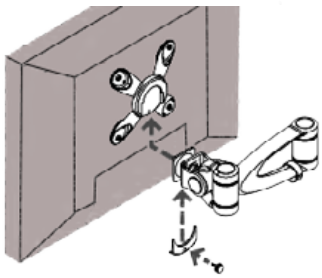
LA6A/C
Monitor Arm

by Kondator

Includes "quick lock", a vertically adjustable monitor fastener, for added security. Wall and desk fixtures included. For VESA 75/100.

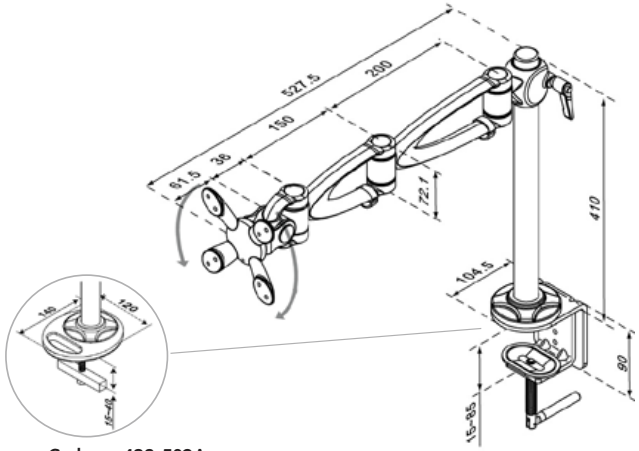
A duo arm may be added for use of two monitors, Part no 438-LA6A and 438-LB62.



Wedge lock – a clever assembly idea ! The arm divides into two halves for simple assembly. The first half is fixed to the monitor, and then easily secured to the other half with a screw. Simple and smooth !

Design without compromise

Design and performance combine with functionality in this elegant, two-armed monitor support. Two four-jointed arms give this monitor support added flexibility.



Accessory: Code no 438-502A
Cables pass through the desk fixture
